Discovered by Nobel Prize winner Emil Fischer around 1900, Xylitol began to be used in foods since the 1960's and has been used widely as a popular sweetener in diabetic diets (minimal effect – glycemic index of 7 – slow, steady release of energy balances blood sugar and insulin levels). More than 48 studies worldwide have been conducted on Xylitol (carried out partially under the auspice of the World Health Organization (WHO)).

Xylitol is a sugar that does not promote the development of dental caries, unlike frequent between meal consumption of other foods high in sugars and starches that can promote dental caries.

The Benefits of Xylitol – The Ingredient:

- Has an active anti-caries/cariostatic effect by reducing plaque forming bacteria. This is a result of lowering the plaque index (reduces the adhesivity at the macro molecular level and reducing the acidogenicity of plaque with Xylitol's (neutral 7.0 PH levels)). As part of the process, Xylitol stimulates the production of saliva; thereby helping to control dental plaque and mutans streptococci.
- Inhibits plaque formation, [plaque is a biofilm that allows bacteria to adhere to tooth enamel], as well as other pathogenic organisms that can ultimately result in periodontal disease.

The Use of Xylitol in Children – Under Age 12:

Can have particularly long term positive effect on oral well being.

Positive oral health effects that have been reported are a remineralizing effect on tooth enamel (depending on daily usage), acting as a periodontal prophylaxis and can have a compounding effect on the benefits of fluoride.

* For more information on studies and benefits of Xylitol: www.hagerworldwide.com

- Children's acceptance & daily compliance of chewing of Xylitol is excellent due to its ease-of-use and great taste.
- Studies have shown xylitol blocks the transmission of mutans streptococci from mother to child.

Studies have shown that with regular use of Xylitol chewing gum there is a long-term effect that may reduce the risk of dental caries.

The Benefits of Xylitol – In Geriatrics:

- Holds and keeps the aging related salivary mutans at a steady level.
- Eases xerostomia caused by the intake of medications which causes a reduction of saliva in the elderly population.

Xylitol's – Low Caloric Value:

- A better alternative for keeping weight down vs. traditional high calorie sugar based chewing gums.
- Xylitol is an excellent low calorie sugar substitute (up to 40% less calories) due to the fact that the human body utilizes the chemical slowly and incompletely; therefore, reducing its caloric value.

How to Use – miradent Xylitol Chewing Gum:

Use immediately after eating and clear the mouth with swishing water.

Adults: 3 times/day x 2 pieces

Children: 3 to 5 times/day x 1 piece

Chew miradent Xylitol Chewing Gum until the taste disappears. The use should be spread out over the day (10 gm to 40 gm).

Mirawhite[®] oxygen

The Peroxide Free Gentle Whitener

- Acts pH-neutral and is free of peroxide
- The alternative for patients with sensitive teeth, gingival problems and multiple fillings
- Does not soften bonding or fillings
- "Soft whitening" is kind to enamel allowing teeth to remain whiter longer
- Apply twice a day for 14 days
- Easy brush applicator pen with 1.8 ml gel

Mirawhite oxygen

630 132

Gel Chamber

The gel contains an enamel friendly agent – no leakage, no drying-out

Dosage

Exact dosage of the gel by a slight turning of the pen end tip

Application

Brush allows a direct application even in interdental spaces

Directions

Apply even and thin layer of Mirawhite oxygen twice a day (8 to 10 minutes and then rinse) for 14 days.

How does it work?

Complex peroxoborate glycerol ester (hydro-carbon-oxo-borate) or otherwise known as "Soft" Active Oxygen.

Tong-Clin Set

Tongue Cleaning Set

- For professional removal of tongue coating and elimination of bad breath
- We recommend the use of miradent Tong-Clin Gel with its cleansing effect in combination with the miradent tongue scraper

Tong-Clin Set, 50 ml Gel plus Tong-Clin De Luxe	# 630 060
Tong Clin Set Display Complete with 21 packages	# 630 024

Color	Singles
Translucent Blue	# 607 027
Translucent Pink	# 607 028

Protho Brush DeLuxe

Denture Brush with Finger-Grip Handle

- Two brush heads: one pointed for the inside groove of the denture, one large for the entire surface
- Ergonomic handle is ideal for elderly patients

Protho DeLuxe, Two Brush Head Design
